Given patient convenience and compatibility with a range of formulations and doses, capsule based dry-powder inhalation (DPI) technology is becoming the preferred DPI drug delivery platform for respiratory and systemic applications.

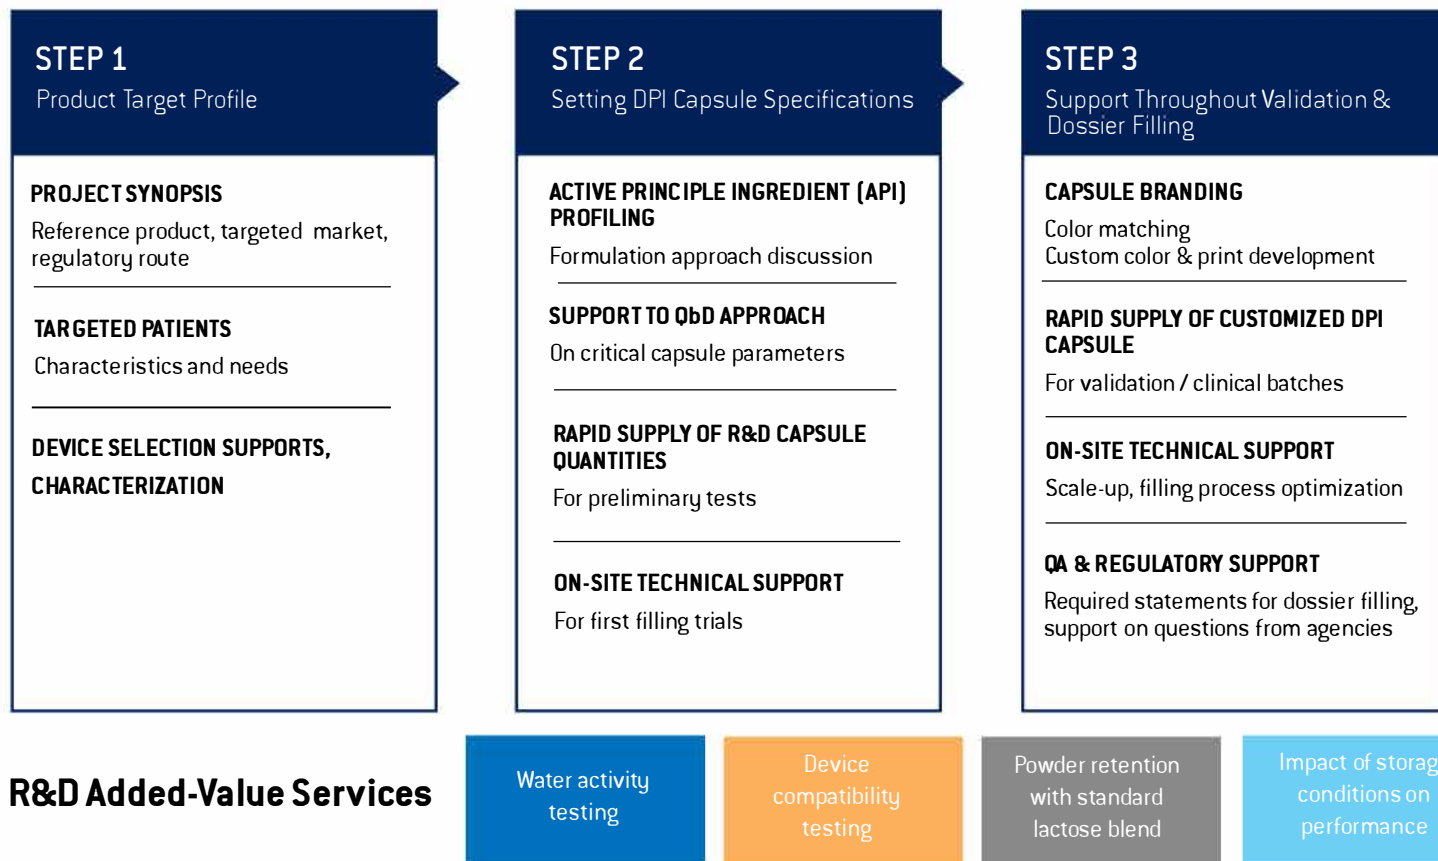

Lonza's Capsugel® customized capsules, in both gelatin and hypromellose, are optimized to provide superior performance and compatibility between the capsule/device and capsule/formulation.

Our offer

DPI Portfolio

- Consistent powder release
- Customized approach to optimize performance of the end product
- Compatible with a large selection of device principles and opening systems
- Ideal puncturing and cutting performance
- R&D and regulatory support throughout the development including QbD approach
- Available in gelatin (Coni-Snap® Gelatin or Coni-Snap® Gelatin-PEG) and HPMC (Vcaps® or Vcaps® Plus) capsules

Customized Approach
