Colorista™ is a high-quality product, part of Capsugel® R&D offer, for pharmaceutical products based on an “all colorants” formulation.

It is available in Coni-Snap® gelatin and Vcaps® Plus printed capsules containing a selection of colorants with a broad geographic scope. It is an optimized tool for formulation development and enables compatibility studies before deciding on the final color for the commercial drug products.

Our offer

Colorista™

- Extension of our R&D offer
- Developed to support stability and compatibility studies
- Selection of colorants covering a broad final color composition choice
- Available from stock in both Coni-Snap® gelatin and Vcaps® Plus capsules
